EDIMS Announces Interface with Proven Healthcare Solutions New Admission Screening Service

“A 24/7 real time admission review process that solves ED case manager coverage issues, fortifies hospital RAC compliance and helps the bottom line”

Livingston, N.J., September 24, 2010 – EDIMS, a provider of electronic medical record (EMR) solutions specifically for emergency departments, announced their new interface capability with Proven Healthcare Solutions, a state-of-the-art provider of real time medical necessity admission review services for emergency department patients.

EDIMS clients will now be able to seamlessly access Proven Healthcare Solutions’ real time admission review service through their EDIMS main grid. “As one of the country’s first and most comprehensive emergency department-specific EMR’s, EDIMS, which is used in hospitals nationwide, was a natural choice for our first EDIS interface. Their long-term history of proven clinical, operational and financial success and high customer satisfaction in some of the country’s top-tier hospitals and health systems, coupled with their outstanding commitment to exceptional customer service, made our decision to select EDIMS an obvious one,” states Scott Serbin, Director of Marketing for Proven Healthcare Solutions.

Featuring the industries’ only 30 minute guarantee, Proven Healthcare Solutions’ innovative approach provides hospitals with a cost-effective solution to the challenge of 24X7 coverage for ED admission reviews. The need for reliable and consistent real-time review services has only increased with the growing complexity of payer requirements. Using the latest Milliman and InterQual evidence-based care guidelines, PHS’s experienced reviewers provide a recommendation as to whether the patient meets criteria for admission, observation or discharge. The response is then sent back electronically to the ED via EDIMS.

“At EDIMS, we are always striving to find solutions that will compliment clinicians’ workflow, improve patient care, and enhance hospitals’ financial outcomes. PHS’s solution addresses all of these by improving ED patient throughput, reducing denials for inappropriate admissions, and ensuring compliance through the appropriate assignment of patients,” said Shane Hade, CEO of EDIMS.

About EDIMS LLC

For over 20 years, EDIMS LLC has been delivering enhanced ED operations through its interoperable ED information management systems. Its electronic health record (EHR) solutions, designed to support clinicians' workflow and provide clinical decision support, are being used at 40 hospitals and long-term care facilities nationwide. EDIMS ability to provide comprehensive order entry, real-time charge capture, and to fully document ED patient encounters helps EDs improve reimbursement and enhance patient care while reducing the amount of time and effort involved in documentation and billing.
