

For Immediate Release

EDIMS Appoints Christian Mueller as Director of Data Operations and Management

Technology executive offers emergency department EHR provider 20 years of experience in software development, database management and systems integration

Livingston, N.J., Septmeber 14, 2010 – [EDIMS LLC](#), a leading provider of interoperable [emergency department](#) (ED) information management systems for hospitals, today announced that it appointed [Christian Mueller](#) as director of data operations and management. Mueller, who has 20 years experience developing software, managing databases and integrating information systems in healthcare and other industries, will oversee data operations, direct interface teams, standardize data processes and [ED](#) system implementations, and offer implementation support and guidance to clients.

"We are fortunate to have an industry professional with Christian's experience and skill-set join our team," said Shane Hade, CEO of EDIMS. "His strong technology expertise and deep familiarity with EDIMS will be invaluable as we help hospitals and health systems navigate federal healthcare reform, meaningful use of electronic records under the American Recovery and Reinvestment Act, and leverage our ED solutions to deliver higher quality, safer and more cost effective emergency care."

Prior to working for EDIMS, Mueller ran his own technology consulting firm where he became familiar with EDIMS' technology by spearheading the redesign of a core piece of its technology, developing many key components to its software and reengineering new, successful storage architecture processes. He also spent eight years as the director of technology at Financial Industry Technical Services Inc., where he was responsible for, among other things, application architecture, database administration, network and data infrastructure, information security, strategic planning and telecommunications. And, he has ten years of experience prior to that as an application development manager and programmer.

"I am very excited to join such a dynamic and fast growing company that offers hospitals an EHR solution that is proven to make EDs more productive and profitable," said Mueller. "We have a great team here and I look forward to contributing to EDIMS' continued growth, success and technology leadership."

About EDIMS LLC

For over 20 years, EDIMS LLC has been delivering enhanced ED operations through its interoperable ED information management systems. Its electronic health record (EHR) solutions, designed to support clinicians' workflow and provide clinical decision support, are being used at 40 hospitals and long-term care facilities nationwide. EDIMS ability to provide comprehensive order entry, real-time charge capture, and to fully document ED patient encounters helps EDs improve reimbursement and enhance patient care while reducing the amount of time and effort involved in documentation and billing.
